SUMMARY

MERN Stack Developer focused on building scalable, production-ready web applications with a strong emphasis on performance, testing, and security. Frontend-leaning with solid backend fundamentals and experience collaborating in team environments

EDUCATION

DRIEMS University

Odisha, India

Bachelor of Technology in Electronics and Telecommunication Engineering

2021 – 2025

- CGPA: 9.29

PROJECTS

Campexxa | *MongoDB, Express.js, React.js, Node.js, JWT, Cloudinary* | [GitHub](#)

Nov. 2025 – Mar. 2026

- Built a MERN-based web app enabling users to explore, create, review, and manage outdoor spots with JWT-based authentication, CRUD operations, image uploads, location-based search, and a personalized dashboard.
- Enhanced application performance, achieving 95+ Lighthouse scores, 100/100 in SEO, Accessibility, and Best Practices, and ~25% faster heavy-route performance.
- Engineered a robust testing and security pipeline, sustaining ~7 requests/sec on free-tier (Render) with >99% success rate (Artillery), 100% pass rate across 50+ test cases (Jest/Supertest), and eliminating 100% of high and medium vulnerabilities via OWASP ZAP security audits.

PulseChat | *Express.js, express-ws, TailwindCSS, Canvas API* | [GitHub](#)

Oct. 2025 - Nov. 2025

- Architected a real-time WebSocket-based chat platform enabling instant topic-based conversations without user accounts using Express-ws, Express.js and TailwindCSS.
- Validated scalability via Artillery stress testing, successfully handling 600 concurrent virtual users with zero failures, sustaining 20 messages/sec throughput under load.
- Demonstrated stable runtime performance with ~91% peak CPU utilisation, efficient memory management (~600–800MB temporary overhead, no leaks), and ~3ms average WebSocket latency in local testing.

FlavorForge | *React.js, Node.js, Tailwind CSS, Bootstrap, Mistral AI API* | [GitHub](#)

Jul. 2025 - Aug. 2025

- Developed a responsive recipe web app using React.js, Tailwind, Bootstrap, and Node.js, delivering API-generated responses within 15 seconds.
- Configured the Mistral AI API via Hugging Face for server-side data retrieval and content rendering.
- Achieved page load time (LCP) below 0.9 seconds — 2.78× faster than the recommended minimum — and maintained a Cumulative Layout Shift (CLS) score of 0, indicating stable page rendering.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), Java, C++, C, Python (Basics)

Frontend: React.js, HTML5, CSS3, Tailwind CSS, Bootstrap, EJS

Backend: Node.js, Express.js, REST APIs, Multer, Cloudinary

Databases: MongoDB, MySQL

Testing & Security: Jest, Supertest, Artillery, OWASP ZAP

Tools & Platforms: Git, GitHub, VS Code, IntelliJ IDEA, Render, Vercel, Netlify

Core CS Concepts: DBMS, Operating Systems, Computer Networks, OOP

CERTIFICATIONS

JavaScript Pro: Mastering Advanced Concepts and Techniques

Udemy

Instructor: Colt Steele

The Web Developer Bootcamp 2025

Udemy

Instructor: Colt Steele

Microsoft Excel – Excel from Beginner to Advanced

Udemy

Instructor: Kyle Pew

Learn C++ Programming – Beginner to Advance – Deep Dive in C++

Udemy

Instructor: Abdul Bari

LANGUAGES

English (Proficient) | Hindi (Proficient) | Odia (Native)
